

HERMES SMART CONTRACT SECURITY REPORT

Scan Date:	2026-07-06 14:47:53
Contract Address:	0x72d199b23fba7d2ff8dd40130126fe46f3a23c79
Analysis Mode:	Raw EVM Bytecode Mode
Blockchain Network:	Base Blockchain (ChainID: 8453)

OVERALL SECURITY SCORE

20 / 100

1. Wallet & Token Distribution Ledger

- Top Holder 1 (Deployer): 45.2% of total supply (High Centralization Risk)
- Top Holder 2 (Liquidity Pool): 30.0% of total supply
- Top Holder 3 (Unknown Cüzdan): 12.8% of total supply

2. AI Agent Autonomous Audit Analysis

Centralization & Wallet Risks:

* High Centralization Risk (Deduction: 20 points): Top Holder 1 (Deployer) holds 45.2% of the total supply. This significantly exceeds the 25% threshold without any stated lock constraints, indicating a high level of control by a single entity over the token.

Code Level Vulnerabilities:

* Raw EVM Bytecode Mode (Deduction: 60 points applied implicitly): The provided code is raw EVM bytecode, which inherently limits comprehensive static analysis. As per the scoring methodology, if the code layer is raw bytecode, the absolute maximum score cannot exceed 40. This restriction has been applied prior to other deductions. Further, the inability to analyze the underlying Solidity (or equivalent) code prevents the identification of critical, high, or medium vulnerabilities. Without source code, it is impossible to determine the presence or absence of issues such as reentrancy, unprotected access control, or integer overflows. The message "Free API access is not supported for this chain. Please upgrade your api plan for full chain coverage." indicates that even the bytecode is not fully accessible or easily auditable via standard tools due to API limitations, reinforcing the inability to perform a complete code audit.

Total Deductions:

- * Centralization Risk: 20 points
- * Code Visibility (implicit for raw bytecode): 60 points (by limiting max score to 40)

Final Score Calculation:

Base Score: 100

Maximum Score with Bytecode: 40 (enforced)

Deduction for Centralization: 20

Final Score: 40 - 20 = 20
